Event Highlight 2010

CHOCOLATE TECHNOLOGY 2010 is just around the corner

Just three months and it will be that time again: after the last meeting in 2008, ZDS again invites you to Europe's biggest symposium on everything to do with chocolate. From the 7th to the 9th of December, the Congress-Center Nord of the KölnMesse will again be transformed into a Mecca for all of the chocolate industry. Over 400 participants from all over the world are expected at this number one event; they will all have the opportunity to inform themselves about all the newest trends and developments in chocolate production through the over 30 high-class expert presentations given by international speakers. Already more than 40 exhibitors round off the convention program, which will for the first time also be accompanied by a comprehensive product exhibition.

This year our top-class organizational committee is yet again offering a highly attractive convention program. Next to world-wide market trends and technological developments, we expect themes such as "Processing High Viscosity Chocolate", "Sustainability" and "Carbon foot print" to be of particular interest to convention visitors. All presentations will be simultaneously translated into German, English, and French.

The number of companies presenting an interesting mix of raw material, technology and product exhibits running parallel to the convention will be more than in 2008 and promises to deliver a highly attractive frame for the convention.

For the first time, this year there will also be a product exhibition that provides visitors with the opportunity to gain an overview of the chocolate market and its newest trends and developments.

The current convention program as well as all registration documents can be accessed immediately on the ZDS website at www.zds-solingen.de. We recommend early registration due to the high number of expected participants and number of reserved rooms in Cologne hotels.
